

Endocrine Disruptor Screening Program

Smithers Viscient provides a comprehensive offering for Tier 1 and Tier 2 endocrine disruptor testing services, including ecotoxicology testing and *in vivo* toxicology services, for the agricultural, pharmaceutical, and industrial and specialty chemical industries.

We provide a portfolio of services with scientific expertise and project management capabilities that ensure the quality of the data and convenience of working with one company. With technical experts in both ecotoxicology and toxicology available to you throughout the study, the screening assay process is efficient and test execution is seamless.

Smithers Viscient was the top provider of List 1 testing services, and offers experienced guidance as your single-source provider for Tier 1 and Tier 2 Endocrine Disruptor Screening Program (EDSP) testing needs.
